

## GROUNDING IDEAS

---

The aim of the Civic Knowledge Project (CKP) is to develop and strengthen community connections, helping to overcome the social, economic, and racial divisions among the various knowledge communities on the South Side of Chicago. We believe that the free and reciprocal flow of knowledge is empowering. Working with many local collaborators, we...

...provide educational and humanities programming linking the University of Chicago to other knowledge communities surrounding it.

...develop institutional policy for the exchange of knowledge among different local knowledge communities.

...serve as an educational and organizational resource for our community.
